

Support for Coon Hunter Diaries

Effective Date: January 10, 2026

Coon Hunter Diaries is designed for coon hunters of all experience levels who want the convenience of a complete hunting log right in their pocket. The app allows you to create dog profiles, log hunts, track detailed statistics, and navigate using GPS technology while in the woods.

This app is for hunters who want to take their hunting logs to the next level by recording important details such as coons treed, missed coons, den trees, slick trees, weather conditions, temperatures, moon phases, and more — all in one place.

Users can also utilize built-in GPS features to mark important locations such as trucks, trees, or meeting points, and share those locations when needed using Apple's mapping technology.

Getting Started & Directions

- 1 Create one or more dog profiles by answering the simple setup questions.
- 2 Add a profile picture for each dog.
- 3 When you are ready to hunt, open the New Hunt tab and log as much or as little data as you choose.
- 4 View, edit, or delete dog profiles at any time. Tap to edit, long-press to delete.
- 5 Navigate to the Journal section to view logged hunts. Tap a hunt to see full details, or switch to Statistics to view running totals for each dog from day one.
- 6 Use the Map view to drop pins for trucks, people, trees, or other points of interest. Measure distance to pins, delete pins, or share locations via text message.
- 7 A built-in compass shows the direction your phone is facing. GPS works best while stationary or moving slowly and may require minimal cellular service. Performance may be limited indoors or at highway speeds.
- 8 If you choose to participate in the Global Leaderboard, your dog's stats may be displayed publicly if they rank within the top 100.

Subscription Information

Coon Hunter Diaries requires an active subscription to access all features. Subscriptions renew automatically unless canceled through your Apple ID settings. You may cancel at any time.

Need Help?

If you have any questions, issues, or feedback, please contact support at **wesleypingleton@gmail.com**.

Thank you for using Coon Hunter Diaries for iOS.

“TREE MY DOG”

Sincerely,
Wesley Pingleton
